

THE SPINBOT 5000

With a ROI that is often with your first use, The Spinbot 5000 is a complete game changer.

The Spinbot 5000 4 barrel, 7 barrel, and 10 barrel models give you THE COLASSAL EDGE in getting your beers first to market – with the ability to dial in the profile of that awesome beer and reproduce it time and time again.

A Master Welder since 1985, Jay Lesher has a stellar reputation and is a respected leader in the craft beer industry, known for brewing, building, repairing, designing, and inventing since 1995. Jay was named one of the 26 top innovators in the brewery industry in *All About Beer*.

Jay invented The Spinbot 5000 in 2013. Currently working at the world-renowned Cigar City Brewing Company in Tampa, Florida, many of Jay's inventions are used on a daily basis.

He also invited several brewery owners and engineers to experience The Spinbot 5000 as it was in use, infusing wood spirals to an IPA.

[Jay Lesher aka Jay the Welder, Inventor of The Spinbot 5000.](#)

Inventor Jay the Welder says that the secret is in the DOUBLE VORTEX INFUSION which gives the most efficient contact time to the ingredients.

Double Vortex

When you master how to reformulate your recipes by reducing your ingredients and contact time, **The Spinbot 5000 will have your Brewmaster thinking outside the brew kettle and designing new beers that were formerly impossible to do on a larger scale . . .**

All were in agreement that they were witnessing the future of Infusion Technology for the Craft Brewing Industry.

The Spinbot 5000 has been used to hop back as well as dry hop . . . use it from the kettle to your bright tanks to barrel blending and much more.

Much easier to clean and much safer than the old

ecstatic infusion flavoring makes it a colossal timesaver.

And though we do not get involved in designing recipes, we can assist in showing how to get the most out of The Spinbot 5000 at your brewery. We understand with this new innovation, there may be a bell curve to learn and understand HOW the Spinbot 5000 works. When The Spinbot 5000 finds a new home at your brewery, you'll be able to refer to a SOP that Jay and other Spinbot owners have put together to help you bend that bell curve and get The Spinbot 5000 up and running.

[Watch this video on our website: Jay explains how your production time of flavoring is reduced with The Spinbot 5000.](#)

Still need more proof? We're happy to connect with one of our satisfied Spinbot customers!

- Choose a 4, 7, or 10 BBL - shipped in 2-3 weeks.
- Available WORLDWIDE
- FREE Virtual or Phone Consultation with Jay Lesher, Inventor of The Spinbot 5000, to discuss which size is best for your production needs.
- Pay by check, bank transfer, or credit card.
- We also have options for leasing and financing.
- Prices include crates, but shipping costs are extra.

Manufactured in the USA
in St. Petersburg, FL at

BREWFAB

Join other breweries throughout America and the world who have made the decision to bring the innovation of The Spinbot 5000 into their daily production.

So bring your decision makers together and contact us to make your appointment directly with the Inventor, Jay Lesher.
